3. Computer lab facilities

The College provides Computer Education through its computer laboratory with LAN System & Internet Facility. All the teacher-trainees are trained in MS Office & usage of the Internet. The laboratory has 15 personal computers with the latest configurations especially for use by the students. Students can work independently on PowerPoint projects, Excel spreadsheets, surf the Net and create their own programs or projects. Systematic training is given of the basic software & programmes. Step by step modules are taught to train them methodically and meticulously. The laboratory is looked after by a qualified computer instructor.

4. Academic Advice/Guidance (Mentor - Mentee)

The college maintains a Mentor- Mentee relationship which enables the students to get guidance from their respective mentors whenever and wherever needed. The mentor enables the personal and professional development of the students. The batch is divided among the professors. The students are supposed to get guidance accordingly as per their respective guide. This mentorship enables the students to realize their potential. This allows them to reach their goals more quickly than they could do on their own. The mentor acts as their role model and helps them with their career development. They provide them constructive feedback and be their coach which enables them to reach the goals on time.
