Documentary evidence for remedial support provided

Documentary evidence for remedial support provided Teachers Mentoring students (Mentor - Mentee)

The college maintains a Mentor- Mentee relationship which enables the students to get guidance from their respective mentors whenever and wherever needed. The mentor enables the personal and professional development of the students. The batch is divided among the professors. The students are supposed to get guidance accordingly as per their respective guide. This mentorship enables the students to realize their potential. This allows them to reach their goals more quickly than they could do on their own. The mentor acts as their role model and helps them with their career development. They provide them constructive feedback and be their coach which enables them to reach the goals on time. The students get the benefit of remedial teaching with the help of these mentor mentee sessions.
